## QUICK GUIDE

## **Lexmark: Installing Mac Print Driver**

- 1. Open System Preferences.
- 2. Press Printers & Scanners.
- 3. Select the + sign to add a printer.
- 4. Select IP and enter the IP address.
  - To find the IP address refer to the user manual of the printer from <u>www.support.lexmark.com</u>.
- 5. Set the Protocol line to Line Printer Daemon and type print into the Queue line.
- 6. Name the printer as desired.
- 7. In the Use line, the model of the Lexmark should auto-populate. If not, follow the steps below.
- 8. Go to www.support.lexmark.com and search for the model of the Lexmark.
- **9.** Select the Macintosh operating system from the drop down.
- **10.** Select the version from the drop down.
- **11.** Select the recommended driver.
- 12. Press I Agree Download.
- **13.** Open the downloads folder and select the **.dmg** file. A new finder window will appear.
- 14. Select the .pkg file to run the installer wizard.
- **15.** Follow the steps in the **wizard** and log in when prompted.
- 16. When wizard is complete, follow steps 1-7.

\*\*Note: Print drivers are set to 2-sided and color by default. For assistance changing default settings, please contact the Loffler service department. Contact information is located on the red sticker on the front of the device.
